

Security with style

The P7032 is designed for flush installation in counters with limited depth and is ideal for banks, reception areas, and cashier areas.

Its sophisticated design enables secure and discreet handover—virtually draft-free thanks to an integrated brush seal.

Simple and reliable operation

The transfer tray is operated manually and intuitively. Both the tray and the counter-rotating cover plate lock securely into their respective end positions.

The release mechanism is conveniently activated with the thumb using a lever attached to the side of the push handle – for precise and controlled handling in daily use.

DESIGN AND SECURITY

Standard Features	Optional Equipment	Security
<ul style="list-style-type: none"> • Robust steel construction • Durable, maintenance-free mechanism • Stainless steel tray with polished surface • Abrasion-resistant housing, black textured finish (RAL 9005 deep black)** 	<ul style="list-style-type: none"> • Delta 2.0 hands-free intercom system for customer-friendly communication between user and client • Finish of surfaces visible from above in stainless steel 	<ul style="list-style-type: none"> • FB 4 - NS according to DIN EN 1522

**Other colors upon request. Please contact us.

INSTALLATION

The tray is inserted from above into the prepared cutout in the counter surface. The surrounding cover frame neatly conceals the cut edges, providing a high-quality appearance. For flush installation, the frame can be recessed directly into the countertop – ideal for modern, seamless surfaces.

To ensure long-term stability, a substructure is required. This reliably supports the weight of the tray without stressing the cover frame.

Future disassembly for maintenance/repair should be considered.

AVAILABLE VERSIONS

MODEL	DESCRIPTION
P7032 / O	Larger version for handing over binders
P7032 / VA	With brushed stainless steel frame and counterweight
P7032 / EI30	Fire-resistant version according to DIN EN 1634-1 in conjunction with DIN EN 1363-1

Other versions upon request. Please contact us.

DELIVERY CONTENTS

Included in the delivery is the P7032 sliding tray in its standard version, featuring an abrasion-resistant textured black frame and matching cover plate in RAL 9005 (deep black).

The set is complemented by a removable insert tray made of high-quality stainless steel – ideal for hygienic and flexible use.

For added comfort and protection, a sealing brush is included, which reliably seals the gap between the cover plate and the upper glass frame, effectively reducing drafts.
